

Innovation in service of ecology

WHO WE ARE

We are independently owned **Family-run company** that has been successfully operating for over **30 years** on the **Polish** and **international markets**.

INNOVATION

We have developed and implemented **an innovative** and **world-unique ecological anchors**. They are manufactured of world-unique **PET composite material specially constructed by ourselves**. It is chemically modified & glass fiber reinforced composite material **with high impact resistance, rigidity & tensile strength**. The SADDAR Eco anchors system is used widely in **construction, installation of photovoltaic farms and garden architecture**. Our products are fully ecological and meet the requirements of the **circular economy**.

PRODUCTION

All our products are manufactured in **our factory** located in Marki, close to Warsaw. Our **modern production lines** allows us to fulfill our clients specific projects and deliver finish goods in a timely manner.

EXPANSION

We are currently operating on **EU an US markets** and **planning to expand worldwide to reach customers in South America**.

SUSTAINABILITY

An environmentally friendly alternative to the use of metal anchors, our composite product is a unique invention, manufactured using a combination of recycled PET bottles, unique recipe and additives (colour, bonding agent, etc.). Utilising recycled PET bottles is a great contribution towards saving our planet: choosing our eco friendly composite alternative to metal minimises the environmental impact of your project.

The production of **1.5 million eco-anchors** per **year** means that with the consumption of **20 bottles per one eco-anchor**, SADDAR can recycle up to **30 million** plastic bottles.

Composite Saddar Products Benefits

DURABILITY

Composite Saddar Eco Anchors are designed for **maximum durability** and **won't crack, split or warp**. Combining the strength of PET material and our innovative technology, composite Eco Anchors are **strong** and **reliable**.

AESTHETICS

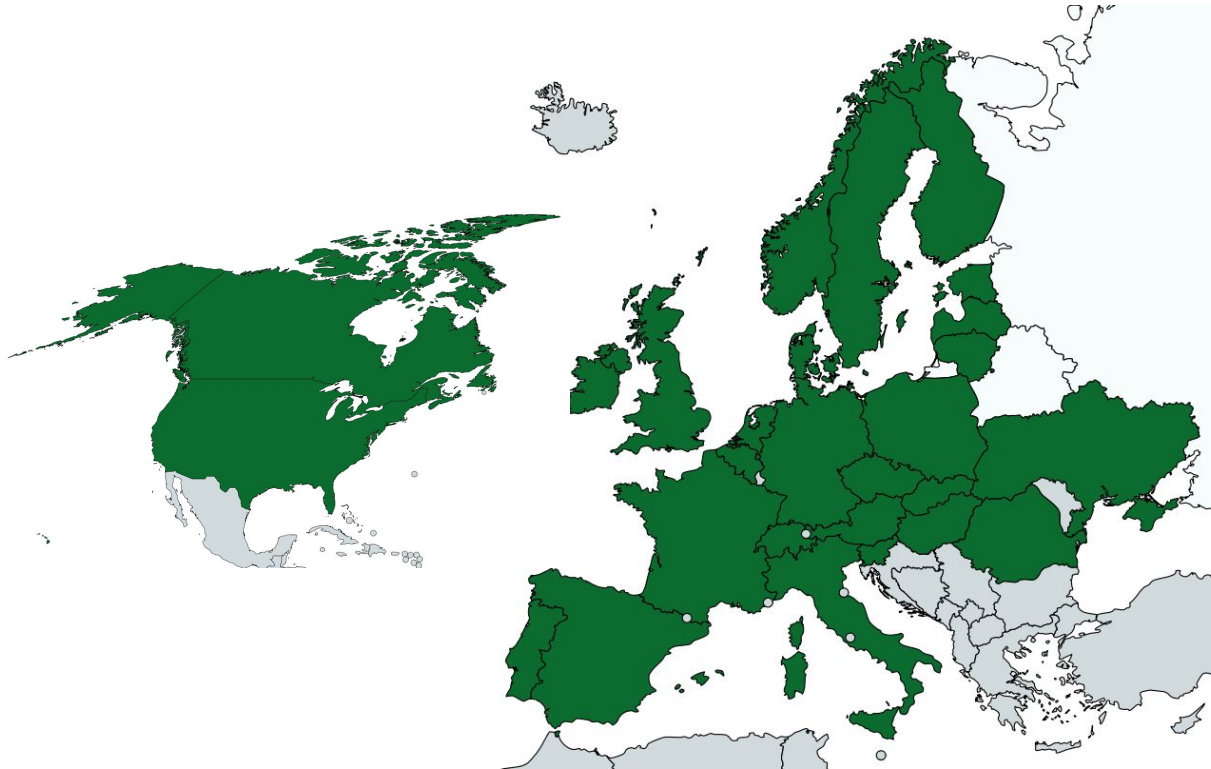

Offering composite **modern look in a strong and practical form**. Our products are manufactured with an authentic look to enhance all projects and areas.

VALUE

Durability and strength of our composite Eco Anchors results in a significantly longer lifespan than could be expected from traditional metal anchors. Our Composite Eco Anchors are **zero- maintenance design**, meaning annual upkeep costs are non-existent, **saving money every year**. **Our products won't rust!**

You will find us here

Pricing & offering

Eco Saddar offers a wide choice of Composite Anchors as well as other fencing & decking accessories, available on the European and US market. With **a wide range of colours**, we also offer **attractive and low price** when compared to the alternative metal products. Contact us to find out more.

Delivery

We understand the need for **fast and efficient delivery** of your order and use safe and reliable courier services to ensure your products reach you as quickly as possible. **Small orders will be delivered within 1-3 working days**, while **large palletised orders will be scheduled for complete delivery within 5 working days** wherever possible.

Reputation

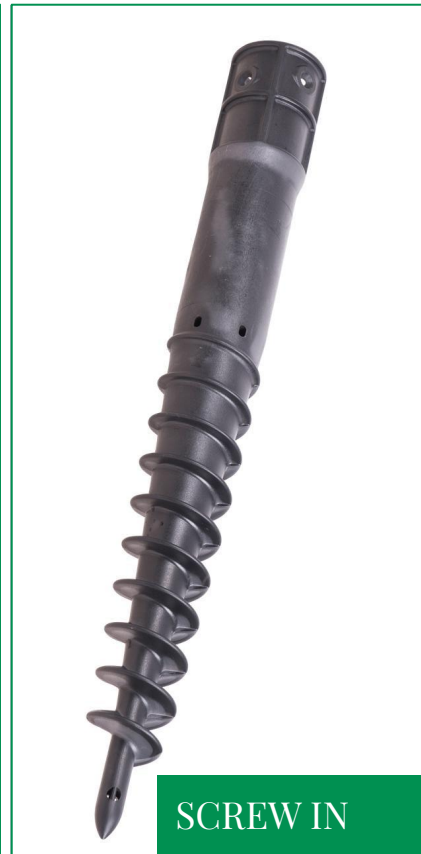

At Eco Saddar Composite we are proud to supply **the highest quality** composite products across Europe and US. Along with **premium supplies**, we take our customer service extremely seriously and pride ourselves on our hundreds of happy customers.

PRODUCT RANGE

In our portfolio there are dozens of models grouped in five main categories: SADDAR Eco Anchors hammer in and screwed in into almost any type of soil or surface, fastening or embedding into concrete. We are also producing Eco Posts and Eco Spikes for widely used fencing systems. Full range of our products are available here: www.saddar.eu

Eco - anchors Saddar meet the requirements of the European Union put to products in the field of closed circulation (**Circular Economy**).

ADVANTAGES OF THE ECO-ANCHOR			STEEL ANCHOR
Eco	+	Transformation of post -value packaging/PET bottles into a full -fledged new product	—
Doesn't rust	+	Does not pollute the soil	—
Resistant to atmospheric effects, including water, ice and frost	+	Long product life	—
Does not require painting	+	No maintenance costs	—
Can be recycled again	+	Environmentally friendly product	—
Innovative technology and unique design	+	Original technical solutions, a product protected by copyright	—
Is lighter	+	Reduction of transport costs	—
